Cybercrime Reporting in India

Knowledge document for the AI Digital Safety & Scam Prevention Assistant

Act quickly: If money has been stolen or a financial cyber fraud is underway, contact your bank/payment provider immediately and call India's cyber-fraud helpline 1930 as soon as possible. Follow the official portal's current instructions for submitting the complaint.

1. Where to report cybercrime

The National Cyber Crime Reporting Portal is the Government of India's official portal for reporting cybercrime: https://cybercrime.gov.in/. Use the portal's current instructions and categories to submit a complaint. For suspected financial cyber fraud, call 1930 promptly and follow the instructions provided for completing the online complaint.

2. Immediate steps after suspected financial fraud

• Contact your bank, card issuer, wallet provider, or UPI/payment provider immediately through the official app, website, or verified customer-care channel. Ask them to record the report and advise on securing the account or payment method.

• Call 1930 as soon as possible for suspected financial cyber fraud in India. Follow the helpline's instructions and submit the online complaint through the official portal as directed.

• Save the complaint or acknowledgement number, if provided. Keep records of when you called, who you contacted, and what actions were advised.

• Do not assume recovery is guaranteed. Fast reporting may help authorities and providers respond, but outcomes depend on the circumstances.

• Do not pay an unknown person an advance fee for a promise to recover stolen money.

3. Evidence to preserve

• Screenshots of suspicious messages, social-media profiles, emails, websites, and chat conversations.

• The sender's phone number, email address, account/profile name, and relevant URL. Do not click a suspicious link just to collect it.

• Payment information such as transaction/reference ID, date, time, amount, payment method, and recipient details visible in your own bank/payment app.

• Copies of emails, offer letters, invoices, receipts, call logs, and notifications related to the incident.

• The complaint acknowledgement number and communications with your bank or service provider.

4. Reporting non-financial cybercrime

For online impersonation, phishing, cyberstalking, suspicious social-media activity, or other cybercrime, consult the categories and instructions on the National Cyber Crime Reporting Portal. Choose the category that best matches the incident and provide accurate information. If there is immediate danger to a person, contact local emergency services or police rather than relying only on an online form.

5. How to make a clear report

• Describe what happened in chronological order: when the contact started, what the person claimed, what you clicked or shared, and what happened next.

• State the dates, times, amounts, transaction IDs, phone numbers, account handles, email addresses, and URLs that you have.

• Explain whether money was transferred, an account was accessed, credentials were shared, or a device/app was installed.

• Attach evidence requested by the official portal, and keep a copy of what you submit.

• Be truthful and do not guess. If you are uncertain about a detail, clearly state that it is unknown.

6. Protect yourself while reporting

Use official websites and contact details that you locate independently. Do not share passwords, OTPs, UPI PINs, card PINs, or recovery codes with people who contact you. Be cautious of follow-up scams in which someone claims to be a police officer, bank official, lawyer, or recovery agent and demands money to close a case or recover funds. A complaint acknowledgement is not a guarantee of recovery.

7. Example scenarios

Scenario A: Money sent to a scammer. Contact the bank/payment provider immediately, call 1930 promptly, follow the official reporting instructions, and preserve transaction details.

Scenario B: Fake job offer requesting a deposit. Preserve the offer letter, recruiter details, chat history, and payment evidence if any. Report through the official portal using the appropriate current category; contact your bank promptly if money was sent.

Scenario C: Email account taken over. Use the service's official recovery process, secure any linked accounts, preserve login alerts, and report the incident through the relevant official channel if needed.

8. What the AI assistant can and cannot do

The assistant can explain general reporting steps and help users organize information for a report. It cannot file a complaint on the user's behalf, guarantee that authorities will recover money, or replace advice from the bank, law enforcement, or official portal. Reporting procedures and portal categories may change, so verify the latest instructions on the official website.
